

1. I am male and have two sisters. My mom has two brothers. Her brothers are both married. One brother has a son and a daughter. The other brother has no children. My father has two sisters and a brother. Both sisters are married, but the brother is not. One sister has two sons, and the other sister has two daughters and a son. Draw and label an Eskimo Kinship diagram for the above family (with “me” as ego).

2. Why is kinship important to study?
3. What is unique about Hawaiian Kinship?
4. What is a parallel cousin and how is it different from a cross cousin?
5. What is the Kinship terminology that our culture follows?
6. Shade in a matrilineage of three generations in each of the diagrams below.
7. Shade in a patrilineage of three generations in each of the diagrams below.
8. Count the potential parallel cousin marriages in the first diagram.
9. Label the potential cross cousin marriages in the second diagram.
