Prof. Rafalski is really starting to want that coffee!

Announcements

- Go to the webpage
- Tues, Oct 6, 5-6 pm
mark your calendars for
"The Shape of Space"

Outline

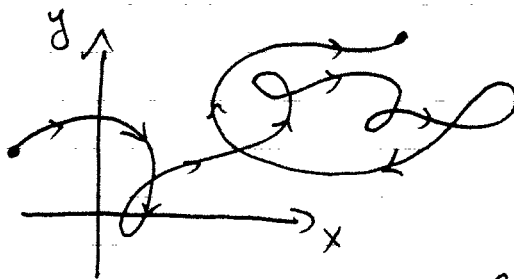

- Syllabus
- Parametric Curves

① Prof. R went over the syllabus, which is on the course webpage.

② We discussed functions, and how almost all functions are multivariable functions.

③ We discussed how the motion of a particle in space can depend on time.

Basic example:

The path of a bug walking around the plane is a parametric curve.

More next time.
